# Hands-on HIGH PERFORMANCE LIQUID CHROMATOGRAPHY (HPLC) WORKSHOP 10-11 April 2019

High performance liquid chromatography (HPLC) is basically a highly improved form of column chromatography. It is used to separate a mixture of compounds in analytical chemistry and biochemistry with the purpose of identifying, quantifying and purifying the individual components of the mixture.

## Topics to be covered:

- \* Overview of Chromatography
  - \* Basic Principle
- \* Instrument Method and Data Acquisition
- \* Data Processing and Reporting
  - \* Troubleshooting
- \* Applications of HPLC technique in drug discovery

## Who Can Attend:

Undergraduate and postgraduate students, researchers and individuals involved in analytical chemistry and biochemistry

## Registration fees : 500 LE

Includes training materials, practical sessions, coffee breaks & certificate.

## For Registration :

- \* Address : Institute of Biotechnology for Postgraduate Studies & Research, Suez Canal University (New campus), Ismailia.
- \* Email: [training\\_ibpr@yahoo.com](mailto:training_ibpr@yahoo.com)
- \* FB page: [https://www.facebook.com/Training Department-IBPR](https://www.facebook.com/Training-Department-IBPR)
